- Automatic Telescopic Doors
- Movable Partition
- Folding Doors
- Automatic & Manual Revolving Doors

# AUTOMATIC DOORS

One of the best things about automatic doors is that it comes in an array of different styles, shapes, colours, finishes and designs. Available in different types such as Swinging, Sliding, Folding, Breakout, Telescopic and Revolving doors.

They are available in tough, sturdy and durable materials such as aluminium, steel, fibreglass, and timber that enhances or complements any home or business's unique style. Automatic doors don't necessitate any human effort or force to perform their operation. It helps do away with the struggle and aggravations when it comes to opening a relatively heavier manual door. Automatic doors grant you the option to open and close the door manually as well.

When installed properly and inspected on a regular basis, automatic doors tend to provide a safe, convenient environment for everyone. The gate can also be accessed with the assistance of a code from inside the property or a remote control from the outside. Additionally, automatic doors are manufactured according to the highest standards for quality and safety, ensuring minimal maintenance requirements thus making them incredibly easy to own, use and maintain as well.

## MAINTENANCE

If you have automatic doors installed at your building, whether commercial or residential, it is important that you plan their maintenance carefully in order to keep them functional for a long time. If you don't take measures to maintain your automatic doors, they can end up damaged before they have reached their full designed service life. We have an expert team for maintenance, they will inspect and solve the problem on time.

# FULL MAINTENANCE SCHEME

Under a full maintenance program, your doors will be inspected and routine preventative maintenance repairs performed after a predetermined time period with the costs remaining exactly the same for each repair. These types of maintenance visits are usually structured on a yearly basis with prices include all material and labor costs that will incur during the maintenance procedure. If you like to create a clear budget for all your expenses beforehand, signing up for a full-service automatic door maintenance program can be very beneficial for your organization, especially since it provides you with a pre-determined fixed cost outlay for door repairs each year.

Depending on what best suits your budget, you can select either of these maintenance program types for your automatic doors. However, make sure you keep track of the expenses incurred on every door separately so that you may make better buying decisions after historical data is considered. There is a time in the service life of every door where the return on investment of a new door will outweigh the costs of continued and more frequent maintenance required to keep a failing door operational.

## FAST AND EFFICIENT AUTOMATIC DOOR MAINTENANCE

# OUR BRAND'S

## A Convenient Way To Ensure Physical Distancing

Shop owners and employers, sports and cultural event organizers all face the same dilemma: to maintain the latest hygienic standards, they need to ensure safe physical distancing by controlling the number of people on their premises at all times. But the available measures to regulate the flow of people are often expensive, inadequate or time consuming. TORMAX count+go neatly solves this problem by counting people and regulating automatic doors. The add-on module is easy to install on any automatic door system and simple to operate using the smart phone.

GEZE stands for innovation, highest quality and holistic support of building services engineering, from the initial idea, planning and operational implementation with series products to tailor-made system solutions and individual service and maintenance. We offer an extensive product range of door, window and security technology and are a major driving force behind the digital networking of building automation. Automatic door solutions for accessibility or fire protection, window drives for natural ventilation or smoke and heat extraction in the event of fire.

## ASSA ABLOY

ASSA ABLOY solutions are used every day around the world. They are found in private homes and businesses operating across many industries. Through a few real examples, we hope to show you why customers choose ASSA ABLOY.

## STANLEY. Access Technologies

In a world where dependability is more important than ever, Stanley Black and Decker delivers the tools and solutions that industrial companies, professionals and consumers count on to be successful when it really matters. Our passion for excellence is seen around the world in our disciplined operations, purposeful business growth and loyal customer relationships. We are the leader in tools and security. We are STANLEY Tools. We are DEWALT. We are Mac Tools. We are Porter-Cable. And we are much more. We are the doors that protect you at airports. We are the hydraulic brakes that rescue trapped earthquake survivors. We are the people on the phone in an emergency. No matter where you live, what car you drive, what store you shop at, or what building you work in, you can bet that we had a hand in making it work. And you can guarantee that we'll keep making it work.

## GILGEN DOOR SYSTEMS

Gilgen Door Systems produces drive systems and complete systems for doors, gates and walls. Our company was founded in 1961. It is headquartered in Schwarzenburg, Switzerland. More than 1,000 employees worldwide work hard every day to ensure good availability of your automatic system. Gilgen Door Systems AG has been part of the Nabtesco Group since 2011. Since its incorporation, Gilgen Door Systems has had one purpose: perfecting its automatic drive systems for doors and gates. We focus entirely on our expertise and our customers. Our systems are only perfect when you are happy. To fulfill your wishes, we exceed conventional industry standards again and again in development, production, assembly and service. That has helped us become the Swiss market leader and a globally successful company.
